

# Avoidable Deaths Network

## Who are we?

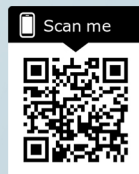

The Avoidable Deaths Network (ADN) is a diverse, dynamic, inclusive and innovative global membership network dedicated to avoiding human deaths from natural hazards, naturally triggered technological hazards and human-made disasters in low- and middle-income countries.

The ADN is led by the Universities of Leicester and Kansai, in collaboration with Chittagong University, Delhi University, the University of the West Indies, Right Insights, International Planned Parenthood Federation, UNDP-Nairobi, Orissa State Volunteers and Social Workers Association and the All India Disaster Management Institute.

## ADN's mission:

To develop a robust and active network that works towards finding theoretical and practical solutions to reducing 'avoidable deaths'.

## What do we do?

- Host an open space to share, discuss and disseminate international, regional, national and local news, research and innovative solutions to avoidable deaths.
- Organise and facilitate conferences and seminars on avoidable deaths to foster trans-disciplinary ideas and solutions.
- Promote state and non-state collaboration through North-South, South-South and triangular cooperation in order to advance the agenda of avoidable deaths.
- Advocate the agenda of mainstreaming avoidable deaths at the heart of all disaster and development activities in low and middle-income countries.
- Publish a bi-annual newsletter.
- Actively solicit and secure private and public funds to promote the above activities.
