

Avoidable Deaths Network

Bulletin

Spring – Winter 2024

The Avoidable Deaths Network (ADN) is pleased to announce the upcoming events, which will be held in different countries, across the globe and through the Spring – Winter season.

There are two types of events: closed and open. The closed events are facilitated for closed audiences or participants. The participants are, generally speaking, policymakers, NGOs and first responders involved in risk, crisis, disasters and development activities in low-and middle-income countries. The open events are facilitated for the general public, ADN's Affiliates and Partners. These Sessions are suitable for disaster responders, students, academics, researchers, policymakers, opinion formers, and practitioners interested in avoidable deaths, the UN's Sendai Framework for Disaster Risk Reduction's Global Targets A and B, and the Sustainable Development Goals.

The details of the upcoming events for the Spring – Winter season are below.
