Happy 7th Birthday, ADN!

Disaster deaths are avoidable. Some early on. Some soon enough. As Mihir R. Bhatt says, "Prevention must become the norm, not the exception." This AIDMI aims to achieve with ADN by building on past seven years of results and by planning for next five years. This is possible. Not easy. But certainly possible by shaping policies, leveraging capacities, piloting innovations, reviewing results achieved, and learning from each other and across all disciplines of knowledge. Best wishes to ADN members. Thank you ADN supporters. And no doubt congratulations to ADN leadership.

Happy Birthday, ADN!

It's a great privilege for me to serve ADN as a regional coordinator from the Bangladesh chapter. Moreover, it's an incredible journey with ADN, which has been working with dedication to raise awareness of preventable deaths worldwide. This network reminds us that many deaths are not inevitable; they can be prevented through awareness, better policies, and collective action.

Best wishes

As one of the oldest members and volunteers of ADN India, I feel extremely proud to witness the network's remarkable growth over the years and its unwavering commitment to disaster preparedness and response readiness in some of the most disaster-prone countries in the world. What makes ADN truly unique is the diversity it brings in terms of its members' expertise and their varied approaches to preparedness and collectivisation. Challenging complacency, strengthening preparedness, and advocating for accountability, the network is helping turn the idea of avoidable deaths into a global call for action. There are huge disparities and diversity in death prevention in accidents and disasters, and we need to jointly work with more passion and drive. Avoidable deaths should not be allowed, Best wishes ADN and all of us!

Happiest 7th Birthday to ADN! Here's to another year of community and enriched, empowered networks that continue to mobilize people to save lives. ADN is a constant reminder that disaster-related loss of life is avoidable when we act in a timely, context-rich manner.

- Anusha Manahil

The first time I went into the ADN website, I saw a post explaining why the term "natural disaster" was wrong, and how disasters happen due to exposure and vulnerability which are always human made. That was an eye opening article that I thought that finally I found a community that speaks my language and I am so proud to have been chosen as the RC of Oman. I hope I continue to be part of ADN, to help raise awareness and create a community that understands that disaster deaths are avoidable. Happy 7th Birthday ADN.

- Moza Al Marhoobi
